NeuroTherm and Cotop International: A Powerful combination

In September 2007 two leading Radio Frequency companies, NeuroTherm and Cotop International, combined their strengths and stepped into the future together. Of course this is a great step for both companies, but more importantly, for the field of pain management this step is very significant. It creates a lot of opportunities and it gives us the possibility to remain leading in the field of pain management. Together, we will operate under the name of NeuroTherm. The name Cotop will remain as our distinct and exclusive needle line. The combination of these two companies enables us to move forward and to be a step ahead in a market that is dynamic, flexible and innovative.

Why?

- Our **Research and Development** department has full support and enjoys the indispensable scientific input from well-known, leading doctors in the field. This way, we're able to come up with new and innovative products. Examples of recently released products are our high quality disposable electrode, the unique StimJect and also our easy-to-use NT 500 generator and the NT1100, the successor of the well-known NT1000.

Bringing new products is not something we do once in a while. It's a constant focus and an ongoing process, which is of the utmost importance to us. You will see more innovative products from us in the coming year. Needless to say that we have already a new product coming up in the spring. It has something to do with the low back and RF....

- Both companies were already known for their **excellent service**. Jointly, we can do things even more efficiently. We have offices in different places in the world and we're excited to have such a committed global network of exclusive distributors.

Since our team has profound knowledge of the products, we can train your staff at the hospital.

As for our deliveries, we have practically all of our products on stock, so we can ship ordered products the same day.

Our technical department has very skilled and well-trained technicians for all repairs and calibrations, so we can guarantee quick and solid service.

- Our **network** of doctors stretches out all over the world. We are very proud that, over the years, we have been able to establish a solid relationship with our customers worldwide. They give us reliable and valuable feedback about our products, which we can incorporate in our production process.

Through our network we can also connect doctors in, for example, scientific research projects and we can help doctors find the answer to their medical questions. Just contact us and we'll connect you.

- **Education** is the basis of medical science. Sharing knowledge is of vital importance, especially when new techniques are involved. We organize several workshops with high-level speakers at various locations around the globe. Open scientific discussions and personal contact with leaders in the field are always highly appreciated during these Masterclasses.

Our commitment to our drive for education is also shown with the independent publishing company FlivoPress, which is a related NeuroTherm. We can offer you books of well-know doctors such as Prof. Sluijter, Dr. Gauci and Dr. van Zundert.

At NeuroTherm we are always a step ahead.

Our passion for quality in everything we do, is something that you can rely on.

Categories of products:

1. **RF Generators:**

- NT 1100
- NT 500
- NT Select

- RF electrodes

2. **Needles for RF and diagnostic procedures:**

- NeuroTherm needles: sharp, blunt, curved (all sizes)
- Cotop needles: SMK, CXE, CX, RCN
- StimJect
- Discography needles

3. **Accessories**

- Oakworks Medical Tables and Spinal Imaging Platform
- Tens units
- Nerve Stimulators
- Spinal needles

4. **Service programs**

- Repairs
- Calibrations

5. **Education**

- FlivoPress books
- Masterclasses (In the US and also in Europe during Spring; among the invited faculty are Prof. dr. Menno Sluiter and Dr. Alex Cahana)

For more information about our products or for other questions, please do not hesitate to contact us.

NeuroTherm is proud to sponsor the British Pain Society, ISIS and the World Institute of Pain.
